Cellek™ decking system, a new innovation from A Vinyl Fence & Deck Wholesaler, provides a better choice for your backyard investment. With its superior quality and labor saving design. Cellek™ decking system is definitely the right choice for your next decking project.

Features & Benefits

- ◆ Not a wood composite product; no wood filler at all
- ◆ Advanced PVC cellular technology
- ◆ Natural "wood-grain" appearance
- ◆ Resist stain, scratch, mold, water, fire, and termites
- ◆ No more warping, rotting or splintering
- ◆ No pre-drilling needed for nails or screws
- ◆ Fastener & groove makes installation easy
- ◆ No unsightly nails or screws on surface
- ◆ 40-50% lighter than most alternatives, and much stronger and more durable
- ◆ No harmful materials, environmentally friendly

LIFETIME
LIMITED
WARRANTY

* Custom colors and lengths are available for volume orders

The Advanced Decking Product For The New Century

Cellek's fastener & groove design enables faster installment and a beautiful finish with no screws on top.

- ◆ With the cellular technology and unique formulations, Cellek™ decking system creates the strongest and toughest decking board in the industry.
- ◆ Composed of virgin vinyl and natural fibers only, Cellek™ decking system guarantees excellent weather resistance with minimal expansion and contraction.
- ◆ Constructed with cellular structure, Cellek™ decking system contains NO wood powders, which promises protection against insect decay and provides a mold and mildew resistance finish.
- ◆ In addition to its wood-grain texture, Cellek™ decking system provides a fastener & groove design. This enables faster installment and a beautiful finish.
- ◆ Cellek™ decking system can be nailed or screwed to even the edge of a board without splitting or mushrooming.
- ◆ While Cellek™ decking system has much more strength and better performance, it only weights almost half of other composite decking materials. The light weight translates into cost saving and easy handling.
- ◆ To make Cellek™ not only look like natural wood, but also have a real wood feeling, Structure has created a Wood-emulated Finish™, which makes Cellek™ decking system even more unique and attractive.
- ◆ To guarantee the best performance on colors, Cellek™ utilizes the pigments made by the world-class companies BASF™ and Clariant™ of Germany.
- ◆ Custom colors, lengths and designs can be specialized for volume orders.

Lifetime Limited Warranty gives you the peace of mind that you need with today's choices.
